## WORK INSTRUCTIONS

- Flowing water temperature must be checked and recorded prior to the first bath of everyday
- To be completed by the employee who will be giving the first bath of the day
- Turn tap to the hottest setting and let it run for at least 1 minute
- Hold thermometer under running water for at least 1 minute, and until the thermometer scale stops rising
- If the temperature is different from the preset temperature, you must repeat the test with a back-up thermometer
- If the back-up thermometer matches the preset temperature, continue with bath
- Throw out the first thermometer and contact ASC admin staff for a replacement thermometer
- If the back-up thermometer does not match the pre-set temperature, discontinue bath
- If temperature **is not** within acceptable range after using the back-up notify ASC admin and supervisor immediately so that follow up can be completed. **A Safety and Maintenance Form must be completed and forwarded to Manager**
