WORK INSTRUCTIONS

- **Acceptable temperature range: 40° to 49° (104° to 120° F)**
- **To be completed on the 1st Wednesday of every month before 11:30 AM** (this allows for immediate follow-up if required)
- Select a different tap in the home each month to be tested (except therapeutic tubs)
- Turn tap to the hottest setting for at least 1 minute
- Hold thermometer under running water for at least 1 minute and until the thermometer scale stops rising
- If the temperature is within acceptable range (**40° to 49°**) record and initial the correct boxes on the form
- If temperature **is not** within acceptable range, repeat test with backup thermometer
- If temperature **is** within acceptable range with the backup, discard the 1st thermometer and request a new one from ASC Admin
- If temperature **is not** within acceptable range after using the backup, notify ASC admin and supervisor immediately so that follow up can be completed. **A Safety and Maintenance Form must be completed and forwarded to Manager**
